### **Project Design Phase-II**

# **Technology Stack (Architecture & Stack)**

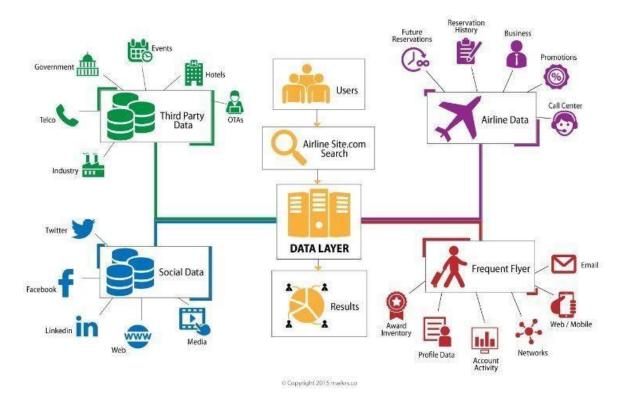

| Date          | 05 November 2022                             |  |
|---------------|--|--|
| Team ID       | PNT2022TMID36981                             |  |
| Project Name  | Airline Data Analytics for Aviation Industry |  |
| Maximum Marks | 4 Marks                                      |  |

#### **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the Table 1 & Table 2.

## **Example:**

### **Airline Data Analytics For Aviation Industry**

**Table-1: Components & Technologies:** 

| S.No | Components                       | Description   | Technology   |
|------|----------------------------------|---|--|
| 1.   | User Interface                   | How user interacts with application. Example: Mobile App  | HTML, CSS, Java Script,<br>Excel                                 |
| 2.   | Application Logic-1              | Logic for a process in the application  | IBM Watson STT service, Python                                   |
| 3.   | Application Logic-2              | Logic for a process in the application  | IBM Watson Assistant   |
| 4.   | Database                         | Data Type,<br>Configurations  | MySQL, NSQL  |
| 5.   | Cloud Database                   | Database service on cloud   | IBM DB2, IBM<br>Cloudant   |
| 6.   | File Storage                     | File Storage requirements   | IBM Blocks Storage or other storage service or Local File system |
| 7.   | External API-1                   | Purpose of External API used in the application   | IBM Weather API  |
| 8.   | External API-1                   | Purpose of External API used in the application   | Aadhar API   |
| 9.   | Infrastructure<br>(Server/Cloud) | Application Deployment on Local System/Cloud Local Server Configuration: Cloud Server Configuration | Local, Cloud Foundry   |

**Table-2: Application Characteristics:** 

| S.No | Characteristics | Description          | Technology          |
|------|-----------------|----------------------|---------------------|
| 1.   | Open-Source     | List the open-source | Technology of open- |
|      | Frameworks      | frameworks used      | source framework    |

| 2. | Security<br>Implementations | List all the security/access controls implemented, use of firewalls.   | Example: SHA-256,<br>Encryption, IAM Controls,<br>OWASP |
|----|-----------------------------|--|---|
| 3. | Scalable<br>Architecture    | Justify the scalability of architecture  | Cognos Used   |
| 4. | Availability                | Justify the availability of application (e.g: use of load balancers, distributed servers)  | AWS Used  |
| 5. | Performance                 | Design consideration<br>for the performance of<br>the application<br>(number of requests<br>per second, use of<br>Cache, use of CDN's) | Dashboard,Reports,Stories                               |
